CHBC Certification Exam Frequently Asked Questions

What are the differences in the two review courses?

The online review course is a self-paced, web based, course that allows the registrant to view slides that are pre-recorded and narrated by the standard NSCHBC certification course instructors. The registrant is allotted 90 days to complete the review course and to schedule a testing session, thus making it possible to work around a busy professional schedule. Additionally, this method facilitates the ability to review specific content as often as possible, depending on individual learning needs.

The live review course is an interactive course in which the registrants and instructors interact face-to-face in a class room setting during the NSCHBC's Annual Conference. The live course is presented by NSCHBC certification instructors and the registrant gains the added advantage of learning with peers and networking with other Society members attending the Annual Conference. A proctored exam session is held the last day of the course to allow students to take the exam while the information is fresh in their minds.

When is the next scheduled Live Review Course?

The Live Review Courses are offered at our Annual Conferences each year.
